CONTINUED EXAMINATION UNDER 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 22 February 2008 has been entered.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 22 February 2008 was filed after the mailing date of the Notice of Allowance on 19 December 2007. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Alan J. Kasper (Reg. No. 25,426) on 07 December 2007.

The application has been amended as follows:

Claim 1 has been amended according to the following:

In claim 1, bridging lines 15 and 16, the phrase "the agency of" has been deleted.

In claim 1, line 34, the phrase "the movement area" has been changed to - - a movement area - -.

In claim 1, line 35, the phrase "the inertial force" has been changed to - - an inertial force - -.

The Abstract has been replaced according to the following final form:

-- A buckle device including a lock bar pushed by a release button for moving to a second position allowing rotation in a direction to release the engagement of a hook member, and a lock member rotated by a release button toward an unlock position at the time of releasing operation of a tongue plate. When the lock bar is butted against a first engagement part where the lock member is at a lock position, the lock member is rotated toward and held at the lock position, and a second engagement part enters a movement area of the lock bar, while an inertial force of the tongue plate in the direction of insertion thereof is exerted at a value exceeding a predetermined value, the release button is butted against a third engagement part to prevent the lock member from being rotated toward the unlock position to hold the lock position. --

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed buckle device having the structural combination where the lock member comprises a base end part pivotally supported by the frame, a first engagement part formed on substantially the central portion of the base end part, a second engagement part formed opposite to the first engagement part while leaving a space through which the lock bar can be received, and a third engagement part provided opposite to the second engagement part and capable of entering a movement area of the release button, and wherein in a state where the lock member is positioned at the lock position, the lock member is rotated toward and held at the lock position when the lock bar is butted against the first engagement part, thereby causing the second engagement part to enter a movement area of the lock bar, while in the case where an inertial force in a direction of the insertion of the tongue plate is exerted at a value exceeding a predetermined value, the release button is butted against the third engagement part, thereby preventing the lock member from being rotated toward the unlock position to hold the lock position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
